

For Immediate Release.

SoftwareSolutions, Inc. Releases *EnterpriseSQL Laser Check Writer*<sup>®</sup>

January, 2005

Contact: [Jon McKinney](#), SoftwareSolutions, Inc.

---

## *EnterpriseSQL* Laser Check Writer

*EnterpriseSQL Laser Check Writer* provides the flexibility of managing local, regional and state departments, branches and offices from one central location, using one central SQL database!

With **over 40 document formats** including Cashier/Official Checks, Customer Account to Account Transfers, Temporary Checks, Loan Coupons and General Accounting Entries, **virtually all customer service and operations areas can benefit from this module.**

### Features & Benefits:

- **100% Windows-compatible**; supports Microsoft Networks 2000-2003, Microsoft SQL 2000 & 2005, Microsoft Terminal Server, Active Directory, Microsoft OS 2000 and Microsoft XP
- Also supports Novell 4.1 and higher and Citrix MetaFrame
- *Remote Loan Disbursement* is an optional module that accommodates loan funding from a Central Operations Center; loan official checks are prepared at central operations and printed at any remote site or branch location
- *Automated BSA Reporting* is also available as an optional module; it accommodates Bank Secrecy Act processing and reporting for \$3,000 Rule Log and Currency Transaction Reports
- Mainframe interface options available
- Transactions are stored in central database and can be easily retrieved for review and replication
- User driven drop down tables for auto input of account numbers, transaction codes and cost center information
- Enterprise-level reporting
- **Data Import/Export modules** are available to move data to or from your mainframe or other third-party system
- Supports third-party Official Check outsourcing services
- Improves employee satisfaction and productivity
- Enhances customer service, provides strong audit control and reduces document costs and proof errors

### About SoftwareSolutions

TJC Software Solutions ([www.TJCSoftware.com](http://www.TJCSoftware.com)) supplies automation software to financial institutions of all sizes. The ownership and management of **SoftwareSolutions** is composed of former commercial bankers with vast experience in a variety of areas, all of whom are committed to understanding the needs of the financial institution when developing and offering software solutions.
