

LASER Loan Coupon

The *LaserLoan Coupon* module is a powerful Windows™ based software tool that produces loan coupon books using standard PCs and laser printers, at a fraction of the cost of pre-printed books.

Designed for central loan operations or individual branch operations, this system provides a cost-effective means for producing personalized **consumer, commercial** and **mortgage** loan coupon books for presenting to customers at loan-closing time.

- ✓ With this **user-friendly** System, **consumer, commercial** and **mortgage** loan coupon books can be quickly produced and made available to your customers **at loan-closing time, thereby eliminating postage expense!**
- ✓ Weekly, Every 2 Weeks, Twice Monthly, Monthly, Bi-Monthly, Quarterly, Semi-Annual, and Annual payment schedules are supported
- ✓ MICR-encoded **Loan Disbursement Checks** are also available with this System.

Type Selection Screen (Main Menu)

➤ **Increase Profitability**

➤ **Improve Employee Productivity**

➤ **Significantly Lower Printing Costs**

➤ **Support of MICR E-13b Fonts**

- ✓ Easy-to-use input screens.
- ✓ **Simple interest** and **pre-computed** loan transactions supported.
- ✓ **Fee income** for replacement books can be tracked.
- ✓ The System prompts for **last payment messages**, such as "Call Bank" or "Call for Payoff".
- ✓ All transactions are retained in a **database**, allowing **review and duplication** of prior transactions.

Through the use of an *integrated database*, the **Inquiry** feature allows for **review and replication** of completed transactions, thereby:

- ✓ **Reducing data entry input** time on repeat and renewal loan customers.
- ✓ **Facilitating research requests** with powerful search options.
- ✓ **Providing ability to group** all of selected customer's transactions together on one search screen.

The **Reports** feature allows for generation of various reports that can be:

- ✓ Targeted to specific **date ranges, transaction types** or operators.
- ✓ Viewed onscreen, in **WYSIWYG (What You See Is What You Get)** format.
- ✓ Printed in **multiple copies**.
- ✓ **Exported to a spreadsheet or database** for reorganization of the data.
- ✓ Generated based on **defined operator hierarchy levels**.
